OBJECTIVE

Motivated and detail-oriented Computer Science and Engineering student with a strong interest in web development and software design. Skilled in programming, problem-solving, and developing user friendly web applications using modern technologies. Eager to enhance technical knowledge and contribute to innovative projects by building responsive, efficient, and impactful digital solutions while continuously learning new technologies and industry practices.

EDUCATION

CARE COLLEGE OF ENGINEERING *Trichy* **BACHELOR OF ENGINEERING IN COMPUTER SCIENCE AND ENGINEERING : 8.38/10**
2023-2027

Lakshmi Matric Higher Secondary School *Manapparai* **HIGHER SECONDARY CERTIFICATE (HSC) :84%**

2022-2023

Lakshmi Matric Higher Secondary School *Manapparai* **SECONDARY SCHOOL LEAVING CERTIFICATE (SSLC)**
2020-2021

SKILLS

Language: Python, C, HTML

Animation: Blender, 2D

Data Handling: Pandas, Numpy

Cloud platform: AWS, Embedded System , IOT projects

Soft skills: Problem-Solving, Communication, Team Collaboration projects

Weather Application

A Web application that provides real-time weather updates including temperature, humidity, and forecasts based on the user's location. Integrated OpenWeatherMap API for live data with a user-friendly UI. Tech Stack: Html, CSS, JavaScript, OpenWeatherMap API

Crop Yield Prediction using ML

A machine learning web app that predicts crop yields based on historical data such as rainfall, temperature, and

cultivated area. Built with Scikit-learn and served using a Flask backend with a clean frontend interface. Tech Stack: Flask, Python, HTML, CSS

Spot Exposure Hedging Bot:

A System developed to manage Cryptocurrency portfolio risk. It tracks holdings, avg entry price, current market value, unrealized and realized PnL. When the exposure crosses a defined threshold, the bot applies hedging logic to reduce the risk.

Tech Stack: Python, Telegram Bot , CCXT/Price API, MongoDB

Recipe Generator App

Developed a responsive web application that provides personalized recipe suggestions based on available ingredients and generates automated meal timetables. Implemented secure user authentication and dynamic UI components for a seamless user experience using React (Vite) and Tailwind CSS. Tech Stack: React (Vite), Tailwind CSS, MongoDB, SpoonacularAPI

Portfolio Website

A personal portfolio website to showcase projects, skills, certifications, and contact details. Built with a responsive layout and interactive components to enhance presentation and navigation. Tech Stack: React.js, JavaScript, CSS, Bootstrap
